*Using the sum of the averages methodology

Why Choose *HighPoints Learning* for your Mathematics Intervention Program?

- Our history of success with underachieving math students
- 39% average improvement in math test performance after taking our program
- 86% of our students improve in their math performance
- Higher test scores and report card grades
- Differentiated learning solutions for every student based on their specific need
- Built-in remediation takes the student back as far as second grade to re-teach concepts that were either never learned or forgotten.
- As an online solution we provide students with a flexible tutoring solution.
- Students/Teacher access at school, after school program, homework assignments. If students use the program they will improve in math. Period.

We hope you'll agree that providing HighPoints Learning as a math intervention solution will be a good choice for your school due to our history of success, outstanding customer support and the flexibility that an online tutoring option provides for your students, teachers and families.
